20+ SUCCESSFULLY COMPLETED PERSONAL PROJECTS
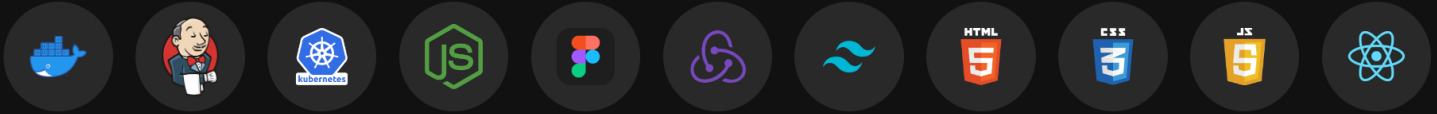

1.5+ YEARS OF EXPERIENCE

A WEB DEVELOPER BASED 🇮🇳 FROM INDIA

As a MERN stack developer and DevOps engineer, I bring a versatile set of technical skills to the table. With expertise in both front-end and back-end development, I am proficient in creating dynamic web applications that deliver an exceptional user experience. Furthermore, my current pursuit of an engineering degree with a specialization in AI at Ajeenkya DY Patil School of Engineering has provided me with in-depth knowledge and expertise in cutting-edge technologies. This enables me to leverage AI techniques and algorithms to develop intelligent applications that can learn, adapt and improve.

As a DevOps engineer, I have a thorough understanding of DevOps principles and practices, allowing me to ensure the efficient and reliable deployment of software. I can manage servers, optimize workflows, and oversee code deployment to ensure seamless and continuous delivery of applications. Besides my technical skills, I have excellent communication and collaboration skills. I can work efficiently with project managers, other developers, and stakeholders, ensuring that everyone is on the same page and working towards a common goal.

Ultimately, I am passionate about developing high-quality software that can make a positive impact on people's lives. Whether I am developing a new feature for a popular web application or streamlining an existing process to improve its efficiency, I am continually seeking ways to innovate and improve. If you are seeking a talented MERN stack developer and DevOps engineer, I would love to connect and explore how my skills and expertise can contribute to your organization.

1.

UI/UX DESIGN

UI/UX Design   Wireframe   Prototype

With a strong command over UI/UX design principles, I excel at creating intuitive and visually appealing user interfaces that enhance the overall user experience. My proficiency in wireframing, prototyping, and conducting user research enables me to deliver seamless and engaging digital experiences.

2.

BACKEND DEVELOPMENT

Backend   Server-side   Database Management   API Integration   Performance Optimization

With expertise in backend development, I specialize in building robust server-side applications and ensuring seamless database management. I thrive in integrating APIs and optimizing performance to deliver efficient and scalable solutions.

3.

FRONTEND DEVELOPMENT

Frontend   User Interface   Responsivness   JS Frameworks   Cross-browser

With a keen eye for design and proficiency in frontend development, I craft visually captivating user interfaces and ensure responsive web design across devices. Leveraging JavaScript frameworks, I deliver dynamic and interactive web experiences while maintaining cross-browser compatibility.

4.

DEVOPS

DevOps   CI/CD   IaC   Configuration Management   Containerization

As a DevOps practitioner, I specialize in streamlining software development processes through effective implementation of CI/CD pipelines. With expertise in IaC and configuration management, I automate infrastructure provisioning and ensure consistent deployments. Leveraging containerization technologies, I enable scalable and portable applications.
